

FAST TACK K231

Multi-Purpose Spray Adhesive

DESCRIPTION

A high performance and cost-effective product that can be used for a wide variety of assembly applications. It is a high-solid, industrial-grade adhesive that is fast-drying, is heat and water-resistant, and provides either a temporary or permanent bond. Fast Tack can be used to bond lightweight materials including: metal, foil, felt, fiberglass insulation, flexible foam, plastic films, polystyrene foam, cardboard, and cork. It bonds dust shields to picture frames and mounts many items to boards, cards, furniture, etc. Its fast tack feature speeds productions for faster part assembly. Its long-tack feature allows 30 minutes of open time so that more parts can be sprayed before assembly. In addition, it has a low soak-in rate, which provides more coverage and stronger bonds. Conforms to ASTM-4236.

Note: This adhesive is not for use on vinyl materials or photos. As with any spray adhesive, some build-up will occur at the spray tip. When fresh, this is removed by simply wiping with a tissue. Dried build-up can be cleaned with a thinner or with Kayline's K155 Snappy II Solvent.

AREAS OF USE

METAL * FOIL * FELT
FIBERGLASS INSULATION * FLEXIBLE FOAM
PLASTIC FILMS * POLYSTYRENE FOAM
CARDBOARD * CORK

FEATURES

FAST TACK: SPEEDS PRODUCTION FOR FASTER PART ASSEMBLY
HIGH COVERAGE: ABOUT 10 sq. ft. per oz.
LONG TACK: 30-MINUTE OPEN TIME. MORE PARTS CAN BE SPRAYED BEFORE ASSEMBLY
LOW SOAK-IN: MORE COVERAGE AND STRONGER BONDS
PERMANENT OR TEMPORARY BOND ON LIGHT-WEIGHT MATERIALS
HEAT & WATER RESISTANT

SPECIFICATIONS

CAN SIZE:	20 oz. Aerosol
NET WEIGHT:	14 oz.
COLOR:	Translucent, viscous liquid
ODOR:	Petroleum distillate odor
pH:	N/A
PROPELLANT:	Dymethyl Ether/Hydrocarbon
SPRAY PATTERN:	Mist
FLAMMABILITY:	Product is to be labeled as extremely flammable as described in 16CFR 1500.45 and 1500.3.
