

EQUIPMENT WAX ^{K79}

Heavy Equipment Coating Material

DESCRIPTION

The latest chemical additives are incorporated into this product to increase the efficiency of snow removal equipment by plating the blades with hard, diamond-like particles. Reduces friction. When applied to the load bed of trucks it aids in easy, complete dumping.

FEATURES

- The latest chemical additives are incorporated in this product to increase efficiency by plating the blades with hard, diamond-like particles
- Increases efficiency of snow removal equipment
- Equipment wax reduces the friction of the snow and slush against the blade and reduces the power required to remove a greater volume of snow and ice
- A special rust and corrosion inhibitor is part of the formula. Equipment may be used right after application, eliminating down-time problems
- Protects equipment from rust and corrosion

APPLICATION

**REDUCES FRICTION * INCREASES CAPACITY * PREVENTS PILING
PROTECTS AGAINST RUST AND CORROSION
DUMP TRUCKS * SNOW PLOWS * EQUIPMENT**

DIRECTIONS FOR USE

DUMP TRUCKS: Spray or brush on load beds of trucks to aid in easy, complete dumping.

DIRECTIONS

Apply with hand sprayer, paint roller or brush. Apply before a snow removal period. If reapplied at the end of each work period the equipment will be protected from rust and corrosion during a time of inactivity and be ready to go when next required. A special rust and corrosion inhibitor is a part of the formula. Plow may be used immediately after application, but if time permits, a drying time 20-40 minutes is recommended.

SPECIFICATIONS

Packaged.....	Drums, 5-gallon pail
Appearance.....	Milky Liquid
Fragrance.....	Characteristic
pH.....	9.00
Flash Point.....	None. Nonflammable
